Mario Carrera

Training, Language and Communication Manager at the gvSIG Association, he has a degree in Topography and a bachelor's degree in Geodesy and Cartography from the Polytechnic University of Valencia. He has been participating in coordination and implementation of Spatial Data Infrastructures (SDI) based on open source technologies and also in corporative migrations to open source geomatics at the Valencian Regional Government in Spain during almost ten years, and in different public administrations (municipalities, and regional and national governments) and companies in the last six years, giving technical support regarding GIS and CAD software. He has participated in several projects about GIS cartographic editing and management for the elaboration of the cartography in different organizations. He has been holding open source geomatics courses and workshops for companies, public administrations and universities in Spain, United Kingdom, Italy, Portugal, Sudan, Jordan and Latin America and Caribbean. Member of the gvSIG Professional Structure and the gvSIG Technical Steering Committee, he has been organizing the gvSIG conferences from their first edition.
